SUBJECT: Request for Domain Unsuspension – www.optizeehotel.store

Dear Sir/Madam,

I am writing on behalf of Optizee Hotel, the rightful owner and operator of the domain **www.optizeehotel.store**, which is used to support our Point of Sale (POS) service operations.

We acknowledge that our domain was flagged due to a phishing-related issue identified at the URL path **/login**. We take this matter very seriously and have conducted a full investigation and cleanup of the website.

The following corrective actions have been completed:

- Immediate removal of the phishing page and all related malicious content
- Comprehensive scan of the hosting environment to identify and delete any unauthorized files
- Reset and strengthening of all access credentials (cPanel, FTP, database)
- Secured application environment and protected sensitive files
- Verified that the affected URL now returns a safe response
- Implemented HTTPS and additional server security protections

We confirm that the website is now fully secured and is being used strictly for legitimate business purposes related to POS services.

We sincerely appreciate your time and assistance.

Yours faithfully,

Isaac Osagie Benjamin

IT Administrator
